

Where there's muck, there's

# boilercass

**Sentinel System Filter, the solid, reliable, cost effective solution to shifting all types of system debris.**

A compact, robust, fully sealed brass unit, the Sentinel System Filter is quick and easy to fit and will last the lifetime of the system, helping to eliminate those un-wanted call backs, saving you time and your customer money. The unit removes all debris, not just magnetic, protecting the boiler and maintaining design efficiencies. With no moving parts it will not clog and is very easy to clean and maintain, with no magnets to remove, no need to dismantle and no valves to shut off.

**The Sentinel System Filter, engineered from solid brass, tough on muck, quick to clean.**
